150 Watt LED Parking Shoebox Retrofit

Project Name _____

DETAILS

150 Watt LED shoebox retrofit kit has a heat sink that is powder-coated white and with a white LED PCB board, it makes any conversion to LED look professional and custom by filling the light window of the shoebox fixture. It is simple to install - just like doing a Metal Halide bulb and ballast replacement. You should also remove the fixture reflector and socket, as they will not be needed. 4 tabs on the retrofit kit are adjustable to align with the holes of the existing shoebox fixture. It is designed to retrofit 99% of existing 16-inch shoebox fixtures.
