

LLS-HVLS-FAN-10FT-6B

10 Foot HVLS Ceiling Fan

Project Name _____

DETAILS

HVLS fans (High Volume Low Speed) are powerful, high-quality ceiling-mounted fans that reduce humidity, regulate air temperatures, and enhance air quality. High-volume low-speed ceiling fans spin much slower while moving large volumes of air rapidly in enclosed areas. Our selection of HVLS fans includes tapered, longer-blade fans available in diameters up to 24 feet. The tapered, long blade engineering makes the elongated blades gradually thinner toward the end, equipping them with the ability to provide more consistent airflow by moving larger pockets of air.
