30 Watt LED Street Light

Project Name _____

DETAILS

Our LED Street Lights are pole-mounted light fixtures designed to light up roadways and urban streets and are a common outdoor lighting solution. They are sometimes referred to as cobra head lights. LED Street lights are mounted on the top of a light pole, and there is usually one light per pole. The light has optics that allow it to distribute the light on the roadway. Streetlights are sometimes equipped with a photocell that turns the lights on at dusk and off at dawn. LED Streetlights fixtures can easily replace high-pressure sodium lights and metal halide road lighting.
